## ACQUISITION OF REGRO

---

### 1. INTRODUCTION

The directors of Regro and EOH are pleased to announce the acquisition of 100% of the issued share capital in Regro by EOH.

### 2. NATURE OF BUSINESS

Regro offers a comprehensive range of telecommunications products (microwave, satellite and fibre) and related turnkey support services to telecommunications operators and service providers. Services include full turnkey solutions for broadband point-to-point (PtP) and point-to-multipoint (PMP) back haul systems for WI-MAX, CDMA, and GSM base stations as well as for enterprise customers.

### 3. RATIONALE FOR TRANSACTION

EOH had identified the telecommunications industry as an area that its business was under-represented in. The opportunity to offer a number of EOH products and services alongside those of Regro to a blue chip customer base affords EOH the opportunity of fast-tracking its offering to the telecommunications industry.

### 4. TERMS OF THE TRANSACTION

The terms of the transaction remain confidential.
